**The University of Scranton** **Scranton, PA**
*Orientation Team Leader* *October 2021 – October 2022*

## PROJECTS

- CLI Group Chat with Client-Server Communication
  - Allowed multiple users to create accounts and log in to the application via FreeBSD Unix server
  - Users could create, join, or leave a group and concurrently send and receive messages via posix threads in C
- Java-PostgreSQL Database Communication Application
  - Allowed user to connect to a PostgreSQL database through a Java application
  - Users could get formatted information and update the database
- Nand2Tetris Java Assembler for Assembly Language to Binary
  - A two-pass assembler comprised of four Java classes that allowed users to input an .asm file
  - The program outputs a .hack file with the translated binary values via PrintWriter
- Multi-Threaded Job Scheduler for Unix
  - This program operates in a command line interface on a FreeBSD Unix server
  - Posix threads are utilized to run simultaneous scheduler and executer algorithms

## SKILLS AND TOOLS

- **Programming Languages:** Java, C, Python
- **Web Technologies:** HTML, CSS (Bootstrap), JavaScript
- **Database Management:** PostgreSQL, Oracle SQL, MySQL
- **Frameworks and IDEs:** Spring (Spring Boot), Eclipse, Visual Studio Code
- **Version Control:** Git, GitHub, GitLab
- **Containerization:** Docker (used for JDBC integration and containerization)
- **Other Tools:** VBA (Visual Basic), Microsoft Office, Google Workspace
